PLANTS AND SEEDS WHOSE SALES ARE PROHIBITED IN WASHINGTON STATE

---

A Summary of Current Regulations on Sales of Noxious Weeds and Other Invasive Exotic Plants

---

WAC 16-752-400 through 420  
WAC 16-752-500 through 525  
WAC 16-752-600 through 660

**Please Note: This prohibited plant list comprises the most recent and accepted scientific and common names of the prohibited plant species in Washington State. However, the prohibited status also applies to any and all synonyms.**

**Washington State  
Department of Agriculture  
Plant Protection Division  
2008**

## Why are sales prohibited?

Every year noxious weeds and other invasive exotic plants cost Washington millions of dollars in lost production, public and private control costs, and environmental degradation. These exotic introductions to Washington have displaced native plant communities, damaged range and recreational lands, and degraded fragile wetlands. Escaped ornamentals are one significant source of infestation. It is often difficult to predict which ornamentals will be invasive and aggressive. Scotch broom, purple loosestrife, and kochia are prime examples of plants which have escaped cultivation and caused enormous economic and environmental damage. The quarantines identify plants known to be invasive and a detriment to the state's natural resources. These regulations will serve to prevent the continued introduction of these problem plants into Washington.
