

County Name	Disposal Contact	Transfer Station or Landfill Locations	Phone Number	Email Address	Website	Solid or Yard Waste?	Species Accepted	Special Programs	Notes from Coordinator
Adams	Anthony Dailey, Solid Waste Operations Supervisor	Multiple Locations	(509) 659-3276	Not Listed	Website	Yard	All	No special programs.	Accepted as yard waste, no cost assistance programs. Within the city limits we do recommend homeowners bag their noxious weeds and dispose in garbage can or transfer station.
Adams District #1	Anthony Dailey, Solid Waste Operations Supervisor	504 S. Lucy Rd. Othello, WA 99344	(509) 659-3276	Not Listed	Website	Yard*	All	The first Saturday of April every year is a free yard waste dump day at the Adams County Transfer Station. Other than that they charge \$45.00 per ton and if the load is under 250 ton it is free. It has to be yard waste and clippings only.	*Royal Organics will not accept yard waste that has been sprayed with a chemical that has a warning on the label " Not for use on any vegetation that is going to be used as a compost". Transline is an example of one of the chemicals sold. It has a long residual and even the high temperature cannot break it down.
Benton	Solid Waste Program, Grant DeJongh, Program Coordinator	620 Market Street Prosser, Washington 99350	509-786-5611 (Prosser) or 509-736-3084 (Tri-Cities)	Not Listed	Website	Solid	All	No special programs.	Coordinator recommends that landowners put any noxious weeds into their garbage.
Chelan	Chelan County Public Works	Multiple Locations	(509) 667-6415	Email	Website	Solid*	All	No special programs.	*Waste Management website discourages people from putting yard waste into the garbage cans, preferring that people take these to a composting facility but staff said if weeds are in a bag in the trash can, they don't open bags, so they don't know what people are throwing in the garbage cans. Composting facilities in the county are not supposed to be accepting noxious weeds, but they are not always staffed with people who know the difference, and I doubt that they inspect what is being dumped, but please don't attempt to bring noxious weeds to composting facilities. I would tell people to bag the weeds securely and take it to the transfer station or put it in your garbage can if its small enough to fit. For people who have large piles I've told them in the past to pile them under a tarp and let them decompose and follow up on the area under the tarp with herbicide if they see any seeds germinating the following year (or years as is sometimes the case).

Grant	Grant County Public Works	Multiple Locations	(509) 754-6082	Email	Website	Solid	All	No special programs.	Needs to be covered during transport to prevent weed loss during transit.
Grays Harbor	Kevin Varness, Utilities Director	4201 Olympic Highway Aberdeen, WA 98520	360-964-1647 ((360) 533-1251 for Transfer Station Staff)	Email	Website				
Island	Solid Waste Manager Joantha Guthrie	Multiple Locations	(360) 679-7338	Email	Website	Whidbey-Solid, Camano-Yard	All	All of the Island County transfer stations accept noxious weeds for free – all species in all Classes are accepted.	There are 3 IC transfer stations on Whidbey: Oak Harbor, Coupeville, and Bayview. Oak Harbor and Bayview are not set up to receive large quantities and they prefer that they are bagged. Coupeville can accept any quantity and as long as the weeds aren't going to seed they do not have to be bagged. If they are close to seed stage I always ask people to bag them.
Jefferson	Tom Boatman, Solid Waste Manager	Multiple Locations	Phone: 360.385.9160	Email	Website	Solid	All	County NWCB has set up an agreement with the Solid waste facility where they'll bury noxious weeds from weed pulls for free in return for 1 or 2 volunteer weed pulls annually on their property. Contact Coordinator for details.	Please clip and bag flower heads before loading / unloading.
King	King County Solid Waste Division	Multiple Locations	206-477-4466	Not Listed	Website	Solid	All	The noxious weed program provides vouchers to landowners (homeowners, rural land owners, etc.) upon request to allow them to dispose of one load (not to exceed one ton) annually at King County transfer station facilities of regulated noxious weeds at no cost to the landowner. Landowners may receive up to two vouchers per year if they have large amounts of regulated noxious weeds that need to be landfilled.	County NWCB provides bags indicating they contain noxious weeds and are OK for land fill. To prevent them from spreading, regulated noxious weeds should be placed in the landfill instead of in yard waste to be composted. It is difficult to tell the difference between regulated noxious weeds, non-regulated noxious weeds, and other weeds. Transfer station employees are not expected to be able to identify noxious weeds. The noxious weed program has been educating landowners about the need to bag noxious weeds and place them in the garbage or take them to a transfer station to be disposed in the landfill.

Pacific	Shawn Humphreys, Senior Environmental Health Specialist	Multiple Locations	North- 360-942-3417 South- 360-642-2541	Email	Website	Solid	All	No special programs.	The local waste management facility does accept noxious weeds as solid waste and asks that they are covered or bagged during transport. Residents should find out what type of plant they are dealing with and how it spreads so that they do not end up making the problem worse (i.e. mulching knotweed)
Pend Orielle	Amanda Griesemer, Solid Waste Coordinator	Multiple Locations	509-447-4513	Email	Website				
Pierce	Pierce County Solid Waste	Multiple Locations	(253) 798-2179	Not Listed	Website	Solid	All	Pierce County offers free noxious weed disposal at the Pierce County landfill, or any Pierce County transfer station.	Weeds must be in plastic garbage bags and identified as noxious weeds when discarding them at the landfill, or transfer stations.

Yakima	Karma Suchan, Manager	7151 Roza Hill Drive Yakima, WA 98901	509-574-2450	Email	Website	Solid	All	No special programs.	The waste management facility doesn't check to see if vegetative waste contains noxious weeds. We recommend landowners who wish to remove noxious and /or toxic weeds from their property, that they send them to the general landfill, NOT vegetative waste which is composted by an independent company and sold as compost.
